

HEALTH AND SAFETY TALKS

79 million
lives saved since 2000 by
global efforts to end TB

10.8 million
people fell ill with TB
in 2023

1.25 million
people died of TB in
2023

World TB Day observed annually on March 24, amplifies the urgency of ending tuberculosis—the world's deadliest infectious disease. TB continues to devastate millions globally, inflicting severe health, social, and economic consequences. This year's theme, ***Yes! We Can End TB: Commit, Invest, Deliver***, is a bold call for hope, urgency, and accountability.

SYMPTOMS OF TB

- Go to your nearest clinic and get screened and tested for TB and HIV if you experience continuous coughing for more than two weeks, unexplained weight loss, night sweats and fever.
- Knowing your TB status reduces the spread of TB, live a healthy life style by exercising and eating healthy.

TB is curable!!!!
