

INCLUSIVITY AWARENESS

International Girls in ICT Day 23 April
2026 Theme:

**AI FOR DEVELOPMENT:
GIRLS SHAPING THE
DIGITAL FUTURE**

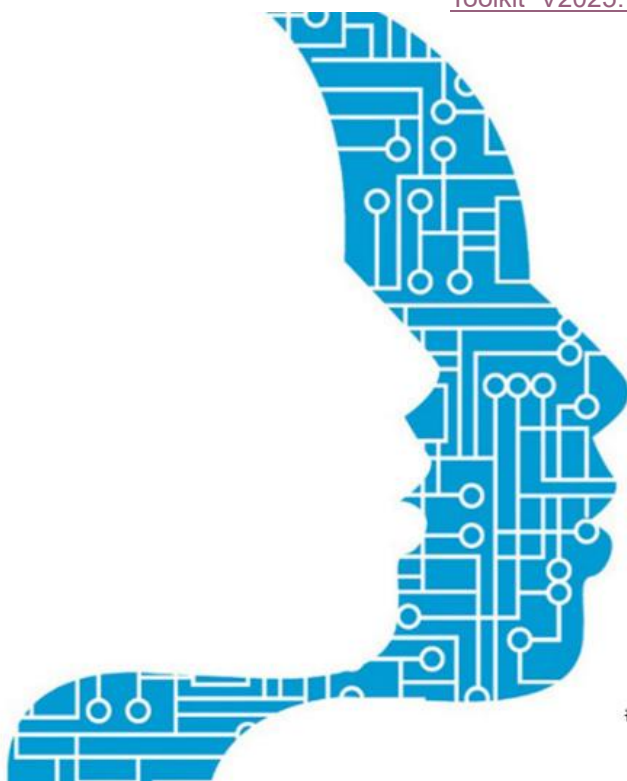

Why it Matters:

- Addressing Gender Disparities: Only 65% of the world's women were online in 2024, compared with 70% of men.

- **Career Opportunities:** The day aims to break down barriers and inspire the next generation of women to take on leadership roles in STEM (science, technology, engineering, and mathematics).
- **Actionable Steps:** It encourages launching girls' tech, coding, or robotics clubs in schools and organizing visits to technology companies

The initiative aims to turn inspiration into action, fostering a more inclusive digital future for all
